

Update Allen Kaaya – January 2019

Dear Sponsors,

I am Allen Y Kaaya, I'm from Arusha Tanzania in East Africa, I'm the fifth child in my family. I really love to learn. My father is well but he has problems with his left hip. My mom is also well although also her leg at the hip joint is not good, doctors said she has rheumatoid arthritis.

For now I am like the caretaker of my family, I want to get very far, I already got to college before I step up but I had to leave it after my mother got burnt. Then I was left to find money to pay for the things my mother and my small brother (or sister) needs - he stopped school because of lack of school fees. I work for day jobs and (something) animal manual and so far I've succeeded to get the things needed for my mother.

My life is easy, for now I work as a volunteer but I get a little money as well, as I do a little business on the side, I tend chicken although they are a few.

I look forward to go as clinical officer for a year then after there I will join my brother as a medical officer. If I get help but if I don't get help I'll just continue to work and I'll know there will be a day that I will succeed to be important for my parents and for my mother.

It will take one year for clinical officer, after that I can study medicine.

Thank you all,

Allen Kaaya
