

Update Rehema Sulle January 2019

Dear Sponsors,

shikamoo kaka yangu, how is your family?

my graduation was good my brother and now am at Muhimbili National hospital for internship programme which takes one year from november 2018 to november 2019.

Currently i am at Muhimbili National hospital to take my internship programme which started right after finishing my university programme on november 2018 to november 2019 , that programme takes only one year after that i will get my lisenca for doing work within the hospital in the country or even outside the country, now am living in makumbusho street at kinondoni district in Dar es salaam,

I like watching movies especially tamthiliya and doing exercise to keep my body active and my general family life is somehow good i thanks God, living with our mother.

My intention for the next year after finishing my internship programme i would like to take my master's degree in midwifery. I meet the necessary qualification because after finishing my university studies i got good GPA which allow me to continue with my studies further. I will be living here at makumbusho if i will do my master's degree at Tanzania.

Thanks
