

It would have been so difficult for me to achieve my academic dream without the intervention of the iSTEPup program. Truly, it would have been impossible. I came from a polygamous background of 2 wives and 9 children and my father was only a subsistence farmer before he past away. I am the last of the 9 children born.. My Mother is an uneducated woman who survives only on her backyard garden with 5 of us. I have gone this far becausee I have a persion for education especially in the saving live sector (Nursing), and as a woman, if there's no help at this juncture, I will definitely failed my dreams.

The eagerness in my life of becoming a medical practioner helped me to find find a career in the Nursing that enable me to take care of myself, and my family, and contribute to save lives in my country. My background status couldn't be able to help me pursure further if the iSTEPup program dosen't intervain.

Moreover,the medical education in Sierra Leone is so expensive that a woman like me would not be able to fulfil my dreams without the help of your program, and I will be grateful if you can contribute towards the fulfilment of my dreams.
