REF: **PROGRESSION OF MY STUDIES AT PADRE PIO COLLEGE OF HEALTH AND ALLIED SCIENCE.**

Refer to the heading above. I am Marietha Angelo a clinical student at Padre Pio College of health and allied science. I am a second year student of level 5 semester two. First I want to say thank you for your giving heart in which you have helped me in one way another through your sponsorship in paying the school fees without your sponsor and support it could not be easy for me to continue with my studies at Padre Pio. Almighty God be with you.

In this semester we are going to start with theory sessions then we will do continuous assessment test (CAT) for theory sessions. Then after we will go to rotation (field) at TEMEKE HOSPITAL which is in Dar es Salaam for one month. After rotation ends we will do practical examinations in which it examines our understanding practically. Then we will do our end of semester two examination in which it comprises theory and practical. Also after finishing my studies I would like to become a gynaecologist in the future.

I will be grateful to my explanation if it is well understood to you and taken into consideration.

Yours faithfully,

Marietha Angelo

M. Angelo

(Clinical student)
