Nurse training

Sierra Leone

Tonkolili Health Sciences College

I am deeply grateful for the support of I step up for making me who I am today as I aim towards my object of becoming a state registered nurse. I am proud to tell you that I have promoted to second year diploma in nurse training. I have sat my second year first semester examination and I am currently posted in Freetown on specialist placement. This is hard to be away from home and family support and the challenge of the distance is great. I am proud of all the tremendous effort I have put in to manage my placements and also achieve very good and excellent grades in some modules, especially fundamentals of nursing and in Sociology. I am excited for the next years and the joys that nursing will bring.
