

July 2024

My name is Peter Gatluak Francis, a South Sudanese who was born and raised up in Kenya as a refugee. My parents relocated to Kenya due to the political instability in our country. My desire is to pursue a bachelor's degree course in Clinical Medicine and Community Health.

As a recent high school graduate with a strong passion for healthcare and a desire to pursue a career in clinical medicine, I believe that this scholarship opportunity would be instrumental in helping me achieve my academic goals and professional goals of serving the society in the healthcare sector. My future aim is to specialize in dermatology. This is because of the rise in skin diseases affecting people in the society.

I am determined to make this dream come true. Receiving this scholarship would not only alleviate the financial burden that I face but would also provide me with the social support to further my education and pursue my career in clinical medicine.
