

Introduction update Magreth

Hello everyone! My name is Magreth Sadock, I am 19 years old and I live in Kabanga Village in West Tanzania. I live with my parents and four siblings. I am the second born of my family and I successfully completed secondary education in 2021. I had good results in secondary school and I always aspired to become a pharmacist. I am interested in how medication works and how it can help people to heal from diseases. I want to study so that I can be a source of medical knowledge to people around me and the community in general. I don't want people to suffer with illnesses that can be treated. That's why I have applied for a course in pharmaceutical sciences in Kigoma. The course starts in October 2024 and I will move from Kabanga to Kigoma to live and study there. I will be going to classes everyday and having discussion groups with other students. I am very happy to get this opportunity and I will work hard to make my dreams come true!
