

Update Anna marie Sambou - January 2025

EDUCATIONAL UPDATE.

Compliment of the Season to the entire Organization of Istep.

In January 2024, I was in my final trimester of studies, However, I also started my Research writing on the topic “**The prevalence of pre-hypertension and hypertension among patients at Lamin Health Centre**”. The research was carried out in my neighbourhood in a health centre under the Dutch Management. On the same vain I also started my six months internship, and I was attached to two main Major Hospitals in The Gambia, and this ended in late June.

Meanwhile, I was excited because the Journey that I started couple of years ago was coming to an end and this was a dream that I was longing for, thanks to the entire istep. Organisation for transforming my dreams into a reality. In July 2024, I sat for the state nursing license examination and shortly after that the results were published and I passed the exams by 87% and I am honoured to tell you that, I am licensed to practice as **a Registered Nurse (RN-BScN)**!

Currently, I Have not started work, but I collected all my documents from the University. The only document that is yet to be collected is my **graduation certificate**, which is to be presented in **June 2025** at the **Graduation Ceremony**.

Regards,

Anna Marie
